

RIEtech Global Motion Control Will Exhibit at Navy Gold Coast Conference

Company will launch TITAN – RIEtech’s first fully integrated EOP platform for marine applications

Albuquerque, New Mexico, - August 13, 2012 – RIEtech Global, LLC today announced that it will be an exhibitor (booth #230) at the 23rd Annual Navy Gold Coast Small Business Opportunity Conference. The conference is themed “*Small Business – Innovation, Agility; Commitment: The Warfighters Advantage*”. The conference is simply known in the Defense community as “Gold Coast”. The purpose of Gold Coast is to provide a forum to educate, guide, and assist businesses, especially small businesses, in working with the government, primarily the Department of Defense.

The conference will be held August 22-24 at the San Diego Convention Center.

RIEtech Global will be showcasing its new fully integrated TITAN EOSS day/night long-range surveillance system. The system includes thermal imaging camera, daylight TV camera, laser range finder and target designator. The system is a battle tested in marine, homeland security, drug enforcement and search & rescue. TITAN’s modular design, ease of maintenance and 10-minute sensor swap-out have made it the Reconnaissance, Surveillance and Target Acquisition (RSTA) system of choice among European naval organizations.

RIEtech will be featuring TITAN in booth #230.

“This is our first visit to Gold Coast. As a veteran-owned small business, we knew we would be at home here”, said Ioana Engstrom, RIEtech’s VP Business Development. “Three of our nation’s largest defense contractors are our customers and we’ll be meeting with them here. That fact, and our launch of TITAN, makes Gold Coast the perfect venue for RIEtech. And, of course, to meet face-to-face with our Naval client end-users to learn how our customization capability can serve them when they need clean-sheet custom designed ISR applications”.
