

**HEADLINE: Sagebrush Technology acquired by RIEtech Global, LLC**

**Date: 5 January 2010**

**For Immediate Release**

Effective December 9, 2009 Sagebrush Technology, Inc. was acquired and now operates as a division of RIEtech Global, LLC. RIEtech Global, LLC is a privately-held development and distribution company specializing in custom product solutions.

All phone numbers and e-mail addresses will remain the same; however the company name is changing to reflect the acquisition.

Additional information can be obtained by visiting our website ([www.sagebrushtech.com](http://www.sagebrushtech.com) OR [www.rietechnology.com](http://www.rietechnology.com)).

Sagebrush is a small business that designs and manufactures computer controlled, precision motion control devices ('gimbals') that enable the effective and efficient utilization of detectors, cameras, lasers, optics, radars, telescopes, antennas and other sensors. Sagebrush products are used in diverse applications world-wide in the defense, communications, surveillance, marine navigation and medical equipment industries.
