

Jacque Rodriquez Joins RIEtech Global As Chief Operating Officer

Joins Team To Support Rapid Growth, Line Expansion & Global Partnering

Albuquerque, NM – August 18, 2010 RIEtech Global announced today that Jacque Rodriquez will join RIEtech Global as Chief Operating Officer. He will be responsible for the operations, distribution and customer support for RIEtech Global: Motion Control and Machining Groups.

“Jacque’s deep and diverse experience in all phases of Aerospace & Defense design, engineering & manufacturing make him ideal to lead our Operations and guide us in our rapid growth”, said Rich Engstrom, Founder & CEO of RIEtech Global. “Jacque and I met and worked together on the same project at another company. I knew then that when I had my own company I’d want Jacque in a key leadership role. His dedication, hands-on problem-solving know-how and customer-focus make him ideal to lead our team”.

Rodriquez has 22 years of aerospace & defense industry experience. After graduating from the University of New Mexico he went to work at Los Alamos National Labs - then to the Air Force Weapons Lab. Later he worked on vital US airborne defense platforms: B-52, C-17 & C-135 transports, F-15 & F18 Fighters and the 2nd generation B-2.

Prior to RIEtech Jacque was Technical Director at Honeywell Defense Space & Electronic Systems. In his last project there he was responsible for a \$50M Integrated Helicopter Avionics Platform. He managed a 60 person engineering team and had both European as well as US Armed Forces customers.

Rodriquez has a BS in Electrical Engineering from the University of New Mexico

About RIEtech Global

Headquartered in Albuquerque NM, RIEtech Global, LLC, is a diversified engineering, manufacturing and distribution company. RIEtech Global is focused on bringing hi-technology to existing markets where current solutions don’t match rapidly changing customer requirements. The company’s RIEtech Global motion control gimbal technology division brings new levels of precision to advanced defense, aeronautical and security applications. The company is a US military veteran-owned business.
